## Accept credit cards on your website with the **SOLUTION ONE** merchant account and payment gateway

### Everything you need to accept payments online through your website

The costs below are for both the **merchant account and the payment gateway**. If you were to get your gateway from one company and the merchant account from another, you would have the same costs, we have simply put them into one easy to use package.

We don't show 'Introductory Offers'. The rate you receive is the rate you stay on. You receive our lowest rates all of the time.

**Remember you do not pay anything until your account is live!**

### Merchant Account

The merchant account verifies and processes credit card and customer information. This includes checking any details supplied are correct.

### Payment Gateway

The gateway securely sends the information through the relevant financial networks to the merchant account.

### Virtual Terminal

To take card transactions over the telephone you simply login to your secure virtual terminal and enter the card information.

### You also get...

Recurring Payments  
Reporting tools  
Batch Processing  
Cart plug-ins

Solution One now comes with a **Business Account**

## Simple application with an instant decision

We've simplified the application process so that you can apply for our merchant account at the same time as our gateway.

## Apply now, it'll only take a minute
